

GK 3-PT Tree Chopper

COMBINING TECHNOLOGY AND TRADITION SINCE 1976

GK 3-PT Tree Chopper

GK Machine's 3-PT Tree Chopper is designed to double productivity when trimming and chopping trees in preparation for the budding process for woody ornamental and fruit trees. This piece of equipment easily chops tree tops to your selected height, preparing them for a variety of budding methods. It also grinds material for easy discard.

One Piece of Equipment to Easily Chop the Top of Trees:

- 3-point mounted and side facing for easy moving in/out of fields
- Adjustable height for various fruit and ornamental trees
- Made from heavy duty steel material and powder coated for field durability

Ideal for a Variety of Tree Crops!

GK's 3-PT Tree Chopper can be used in a variety of crops such as fruit trees, deciduous trees, woody ornamentals and some shrub varieties as well. Budding fruit trees is the principal method of propagating new fruit trees, but it is frequently used for other tree types and a variety of woody shrub plants. The technique is extensively used by commercial tree growers.
