

GK Top Trimmer

COMBINING TECHNOLOGY AND TRADITION SINCE 1976

Lightweight, low-cost, battery-operated solution for fast and flexible plant trimming

Say goodbye to labor-intensive plant trimming and hello to the future of horticulture with the GK Top Trimmer - a lightweight, battery-operated solution designed to save time, reduce costs, and deliver exceptional trimming results. Whether you're working over growing trays or plant beds, this innovative machine is your ultimate greenhouse companion.

Precision Trimming

The adjustable cutting height ensures a perfect cut every time, creating a consistent and professional finish for your plants.

Lightweight & Portable

Designed with a mobile frame on four wheels, the GK Top Trimmer is easy to maneuver across greenhouse growing trays or fields. Its compact design allows for easy transport.

Durable & Ergonomic

Built with high-quality cast aluminum and SK5 hardened carbon steel blades, the GK Top Trimmer is made to last. Ergonomic, non-slip handles with shock-absorbing pads reduce hand fatigue, ensuring comfort during operation.

Why Choose the GK Top Trimmer?

Save Time & Labor Costs

With the GK Top Trimmer, two workers can trim plant beds faster and more efficiently than a larger manual crew. Save up to 80% on labor costs while achieving more uniform results.

GK Top Trimmer

COMBINING TECHNOLOGY AND TRADITION SINCE 1976

Designed for Greenhouse Efficiency

The GK Top Trimmer is engineered explicitly for greenhouse growing trays, offering unparalleled flexibility and ease of use. Its mobile frame allows for seamless operation, while the adjustable wheelbase and cutting height ensure adaptability to various trimming needs. Whether you're cutting material from growing trays or harvesting plant beds, the GK Top Trimmer delivers superb results every time.

Key Features:

- **Lightweight Design**
Weighing only around 115 lbs., the GK Top Trimmer is easy to handle and transport.
- **Adjustable Cutting Height**
Customize the cutting height to suit your specific needs, ensuring precision and flexibility.
- **Cutting Width & Wheelbase**
Standard cutting width of 50" and adjustable wheelbase (customizable upon request).
- **Efficient Blade Technology**
Hardened carbon steel blades, effortless trimming.
- **Ergonomic Handles**
Non-slip handles reduce hand fatigue for a more comfortable trimming experience.
- **Safety First**
Equipped with a built-in safety lock for secure operation.

Compact & Convenient

The GK Top Trimmer's frame is designed for easy mounting and compact transportation. It can be delivered on a single pallet, making it a hassle-free addition to your greenhouse operations.

Experience the Future of Plant Trimming Today!

Transform your greenhouse operations with the GK Top Trimmer. This innovative, labor-saving device will save you time, reduce costs, and achieve professional trimming results.
